Education

ATENEO DE DAVAO UNIVERSITY

Bachelor of Science in Computer Science
Cumulative QPI: 3.68/4.00

Davao City

PROFESSIONAL & LEADERSHIP EXPERIENCE

SAMAHAN SYSDEV Frontend Developer

- Collaborate closely with UI/UX designers and backend engineers to ensure seamless integration of university-wide web applications for Ateneo de Davao University.
- Set milestones and manage timelines for the development team, ensuring all digital tools are delivered ahead of major cluster events.
- Author and maintain clear documentation for system architectures and user manuals, facilitating easy handovers and long-term project sustainability.

SOURCE CODE COMMITTEE Project Head

- Set milestones and managed timelines for the development team to ensure that all digital tools were delivered ahead of major cluster events.
- Authored and maintained clear documentation for system architectures and user manuals, ensuring easy handovers and long-term project sustainability.

SAMAHAN DEPARTMENT OF ACADEMIC AFFAIRS CS Cluster Academic Affairs Assistant Head

- Working assistant to the CS Cluster Academic Affairs Head spearheading initiatives to address academic-related concerns of the CS cluster

DELISOFT STUDIOS Roblox & Minecraft Game Developer

- Developed dynamic user interfaces for inventory and shop systems with fully functional background logic.
- Engineered a complete obstacle course game incorporating progress tracking, checkpoint saving, and teleportation mechanics.
- Designed and modeled custom entities, creating an add-on pack of companion entities with distinct personalities and functionalities.
- Collaborated on a transport vehicle add-on pack, programming technical behaviors for 2 cars, a motorcycle, a boat, and a helicopter.

TECHNICAL PROJECTS

Golem Elemental Minecraft Addon (Commercial Release)

- Engineered the core gameplay logic and technical framework for a commercial Minecraft Bedrock Add-On.
- Programmed custom entity behaviors, animations, and interaction events using Bedrock's behavior pack systems and JSON logic.
- Developed AI routines and unique mechanics for multiple custom pet entities, including the Eclipsid, ensuring balanced gameplay and seamless integration into the Overworld.

CSSEC Website

- Built and optimized a student organization website utilizing a responsive, reusable component structure.
- Implemented data-driven pages for events, projects, and officers, ensuring heavy assets load efficiently in production environments.
- Successfully deployed the site's frontend to Netlify and backend to Hostinger, independently troubleshooting and resolving production build issues related to routing and assets.

Sentiment Based Website Satisfaction Index Using Word Vectors

- Developed a Python-based GUI application using Tkinter and NumPy to quantify user satisfaction (WSI) via word embeddings and cosine similarity.
- Engineered a modular NLP pipeline that vectorizes textual feedback and automates sentiment classification into positive, neutral, and negative categories.

Jebran Miki Website

- Developed a full-stack e-commerce platform for the Jebran Miki Company utilizing Python, Django, and Vite React.
- Implemented comprehensive management modules covering User, Product, Inventory, Order, Sale, and Production processes.
