Organizations

SAMAHAN SYSDEV

- **Frontend Developer**

- Works closely with UI/UX designers and backend engineers to ensure seamless integration of university-wide web applications for Ateneo de Davao University.

Source Code

- **Project Manager and Full Stack Developer**

- Set milestones and managed timelines for the development team to ensure that all digital tools were delivered ahead of major cluster events.
- Authored and maintained clear documentation for system architectures and user manuals, ensuring easy handovers and long-term project sustainability.

Work Experience

DeliSoft Studios

June 2025 - November 2025

Roblox Game Developer (Developer)

- Made user interfaces with different functions such as inventory and shop with fully functional logic.
- Made a simple obby game showing progress, checkpoint, and teleportation logic

Minecraft Game Developer (Developer)

- Modeled and designed entities
- Created an add-on pack containing entities with different functionalities and personalities that act as companions of the player
- Contributed in creating an add-on pack of transport vehicles including 2 cars, a motorcycle, a boat, and a helicopter

Project Experience

Spotify Duplicate

- Building cross-platform UI with Flutter's widgets and responsive design principles.
- Creating smooth transitions and interactive animations with Flutter's animation tools.
- Setting up user authentication with Firebase Authentication (Google, email, or social logins).
- Storing and retrieving data using Firebase Firestore or Realtime Database.
- Implementing streaming protocols and handling buffering efficiently.

Jebran Miki Website

- Used Python, Django, and Vite React for stack completing the e-commerce website for the Jebran Miki Company
- Contained modules such as User Management , General , Product Management , Inventory Management , Order Management , Sale Management , and Production Management

CSSEC Website

- Built and improved a student organization website with a responsive, reusable component structure.
- Implemented data-driven pages (events/projects/officers) and ensured images/assets load correctly in production.
- Deployed the site successfully to Netlify and fixed production build issues related to routing/assets.

Golem Elemental Minecraft Addon

- Engineered the core gameplay logic and technical framework for "Golem Elemental," a commercial Minecraft Bedrock Add-On.
- Programmed custom entity behaviors, animations, and interaction events using Bedrock's behavior pack systems and JSON logic.
- Developed AI routines and unique mechanics for multiple custom pet entities (including the Eclipsid), ensuring balanced gameplay and seamless integration into the Overworld.
- Managed the technical pipeline to ensure the add-on met strict performance and quality standards for successful publication on the commercial marketplace.
